

Attorney Docket No. 2102397-992830

REMARKS/ARGUMENTS

Claims 1-44 and 52-90 are pending in the application. Claims 16-21 have been rejected. Claims 1-15, 22-44 and 52-90 have been allowed. Claims 16-19 have been amended. Reconsideration is respectfully requested.

Claims 16-21 have been rejected under 36 U.S.C. Section 102 (e) as being anticipated by *Pereira et al.* (U.S. Patent No. 6,697,276).

Claims 16 has been amended to recite "a plurality of non-volatile memory cells."

As understood *Pereira* at best merely discloses a memory array 801 and a plurality of tag bit cells T. *Pereira* does not disclose or even suggest non-volatile memory cells. Applicant has conducted a word search for the words "non-volatile" and "volatile" in *Pereira*, and had one hit in column 49, lines 2-11. The reference to non-volatile storage relates to storing a parameter  $T_R$  in a configuration register 819 of Figure 13. This is not "a memory array including a plurality of non-volatile memory cells arranged in segments" as recited in Claim 16. Lacking at least this claim feature, *Pereira* cannot render Claim 16 unpatentable. Because Claims 17-21 depend directly or indirectly on Claims 16, *Pereira* cannot render Claims 17-21 unpatentable. Therefore, it is respectfully submitted that Claims 17-21 are patentable over the references of record.

The allowance of Claims 1-15, 22-44, and 52-90 is noted.
